

Extension

Installation

Hardware Brand:
Andersen

Loosen the set screw on the **INSIDE** door handle. Pull off the inside door handle. Then pull off the outside door handle with the spindle attached.

Loosen the set screw on the **OUTSIDE** door handle. Remove the old spindle and insert the **NEW, LONGER SPINDLE**. Now tighten the set screw.

Replace the **OUTSIDE** door handle with the new spindle back into the door.

Install the **ENCI Extension**. Push both the inside and outside handles together gently and tighten the inside set screw. Make sure that the handles turn freely but not loosely.

If necessary, you may install nylon washers on one or both ends of the extension so that the handle turns easily.
